## Scientific Evidence For Creation: Design In Nature

Frank Sherwin describes the tools needed to discover objects that have been made ('created') vs. objects that form over time, chance and natural processes. Evidences for creation are presented from the microscopic world (bacteria) and the macroscopic world (animals such as the bat and wood-pecker).

## Human Evolution

Using evidence from genetics and the fossil record, Frank Sherwin gives a non-technical presentation showing that people have always been people as Genesis states and did not evolve from sub-human ancestors.

## God's Amazing Insects

Frank Sherwin shows that, according to the fossil record, insects have always been insects and there is no indication that they evolved from non-insects.

## Mathematics And Creation

Don DeYoung discusses math as the underlying language of creation. Intricate patterns, symmetries and design exist throughout nature, all showing the fingerprint of the Creator.

## The Laws of Nature

Natural science has no credible explanation of the origin of basic laws such as gravity, heat, motion, and light. They all have a theological basis. Don DeYoung will describe the basic physical laws, their creation connections, and their challenge to naturalism.

## The ICA Stones: Hoax Or History

Dennis Swift shows amazing anatomical details of dinosaurs found on thousands of stones that defy explanation, unless they were carved by ancient people of Peru a thousand years ago who saw dinosaurs up close and alive.

## Dinosaurs Dinosaurs Dinosaurs!

Ancient people did rock art, pottery, stone carvings and textiles with dinosaurs on them. They had to see living breathing dinosaurs. Dennis Swift sites several examples in this presentation. The Bible was right after all.

## Geology And The Clash Of Worldviews

Geologists say there has been no global flood as described in the Bible, despite the existence of a monumental body of evidence. This presentation provides an introduction to geology and argues for an interpretation of the geological column that is naturally derived from the Biblical account.
