

Evolution's Four Fatal Flaws February 19th at 7PM

Description: It has become abundantly clear that evolutionary thinking is not based on scientific evidence. This lecture offers four major challenges to the "theory" of Evolution. 1) (Macro) Evolution has never been observed. It takes a giant leap in faith to get from (micro) evolution, which has been observed, to (macro) evolution. 2) No credible transitional fossils have been identified in the 150 years since Darwin wrote "Origins of Species." Evolution did not happen. 3) Life can/did not originate from non-life by random chance. Evolution can/will not happen. 4) Evolution is in conflict with the Second Law of Thermodynamics. Evolution in fact is impossible. Evolution is a philosophy and a belief system, not science.

About the Speaker: Dr. Heinz Lycklama earned a Bachelor's degree in Engineering Physics and a Ph. D. degree in experimental Nuclear Physics from McMaster University in Canada in 1965 and 1969 respectively. Since then he has worked in the telecommunications and computer software industries at Bell Telephone Laboratories in NJ and at Interactive Systems Corporation in CA.

Being challenged in his Christian faith by what he was taught in university in the 1960's, Dr. Lycklama has always maintained an active interest in the Creation vs. Evolution controversy. He has developed a series of lectures on this topic over the years and presented the material in Sunday school classes, to college students, during church services and also at an overseas seminary.

The Apogetics Symposium will occur on the 3rd Thursday each month, and feature multimedia presentations by speakers, scientists, and authors who are dedicated to defending the Bible against naturalism. The events are free and open to the public and generally suitable for ages 11 and up. Educational resources will be available for sale from the NW Creation Network.

16300 112th Ave NE Bothell, WA 98011
